"CURED"

"Cured" the Cornelius way assures the best results and quality.

Our soil is a heavy sandy loam soil that enables us to produce a ball that is compact thus assuring an unbroken ball. Our farm is irrigated from our own lake and this enables "controlled" moisture and growing. Our lake is supplied by a large deep well and a "safety factor" of evaporation and use is maintained in order to have an ample supply of water on hand at all times.

We are able to dig the year 'round in our soil and the manner by which our trees and shrubs are "cured" assures the minimum shock and wilt.

"Top of the Crop"

In order to assure our friends of a constant supply of CONTAINER GROWN plants, we "can" the year 'round. For greater profits, plant anytime.

Constant research and new ideas are pursued in order to produce larger quantities and most of all to produce a better quality of plant material.

We appreciate your business.
